

Calendar Feeds

- **Public subscriptions** are convenient because they can update your Calendar.
- There is no password protection; your Calendar information is technically open to the public.
- To access your Calendar, other Users must know the specific URL, so your personal information is still protected.

NOTE: Your institution might not allow the public subscription option.

Save Profile

From the Edit Profile page:

- Copy the **ICS URL** link.
- Set **Enable Public Calendar Feed** field to **Yes**.
- Click **Save Profile** button.

- i** For **faculty**, the calendar feed includes all events for which that faculty member is listed as an instructor. For **students**, the calendar feed includes all of the events for which that student is enrolled.

Google Calendar Web Version

- Open Google Calendar,
- Click the **+** sign on **Other Calendars**.
- Select **From URL**.

Sync Google Calendar

From URL

URL of calendar

☐ Make the calendar publicly accessible

You can add a calendar using the iCal format by its address.

Add calendar

- Paste the ICS calendar link into the **URL** field.
- Click **Add Calendar**.
- The Calendar is now synced with Google Calendar.

Apple Calendar

- Open Apple Calendar.
- Click **File**.
- Select **New Calendar Subscription**.

Sync Apple Calendar

- Paste the ICS calendar link in the **Calendar URL** field.
- Click **Subscribe** button.
- The Calendar is now synced with Apple Calendar.

Outlook Calendar

- Click on **Add Calendar**.
- Select **Subscribe from Web**.

💡 We recommend completing the set-up process in the web version of Outlook rather than the desktop application.

iOS Calendar

- Click on the **Settings** App.
- Select **Mail, Contacts, Calendars**.
- Click **Add Account**.

Add Subscribed Calendar

- Click **Other**.
- Select **Add Subscribed Calendar**.

- Paste the ICS calendar link in the **Server** field.
- The Calendar is now synced with iOS calendar.

CalDAV

- **CalDAV** provides password protection for calendar data.
- Only clients that support **CalDAV** will be able to sync the Calendar (this includes the Apple Calendar program).

- Enter the System Account User info.
- Paste the **CalDAV** server address in the **Server Address** field.
- Click **Create** to add the calendar.
- The Calendar is now synced with iOS Calendar.

CalDAV for Android

- [Caldav Sync Free Beta](#) is a free **CalDAV** sync tool for Android that has been tested to work with the System.
- Once installed, select **Account Settings > Add account > CalDAV Sync Adapter**.
- Enter the System Account User info.
- **Paste** the the System **CalDAV** server address.

NOTE: [CalDAV Sync](#) is another option and costs about \$3. It has not yet been tested with **the System**.

ICS File Export/Import

- The **ICS** file export allows Users to download password-protected calendar data to be imported into a client such as Apple or Google calendars.
- **ICS** export cannot be subscribed to in most clients.
- To refresh the Calendar an export is downloaded and imported to the calendar client each time.

Remember: to use the password-protected **ICS** file export, always use your the System password.
